

COMMUNITY HEALTH NEEDS ASSESSMENT

TOP HEALTH PRIORITIES

- 1 Childhood obesity
- 2 Cancer prevention and screenings
- 3 Depression

COLLABORATION EXAMPLE

"We collaborate with the hospital each year at their skin and prostate cancer screening clinic, held at the Tammy Walker Cancer Center. Providers from Salina Family Healthcare Center perform skin cancer checks free of charge at this community event. Also, in the month of March, we partner with the hospital's Tammy Walker Cancer Center by providing free colorectal screening kits."

CARE COORDINATION & PATIENT-CENTERED MEDICAL CARE

"As a Level 3 NCQA recognized Patient-Centered Medical Home, care coordination is at the heart of the medical home concept. Several activities we have focused on in the past year include the utilization of our Community Resource Navigator/Case Manager and the implementation of our transition of care program. Patients can either be self-referred or provider-referred to our Community Resource Navigator for assistance with a wide range of needs, such as medication, housing, food and transportation assistance."

ADDRESSING COMMUNITY HEALTH PRIORITIES

"Our Compliance and Performance Improvement (CPI) Committee has formed a Health Care Plan (HCP) subcommittee focusing on improving Child/Adolescent Activity and Nutrition Counseling. Through the work of this subcommittee, we have incorporated handouts on age appropriate activity and nutrition, which are given out at Kan Be Healthy appointments."

COMMUNITY PARTNERSHIPS

HOSPITAL "providers have admitting privileges...pro-bono care... OB, labor and delivery...collaborative relationship"

HEALTH DEPARTMENT "collaborate to provide testing for TB, medical care for refugees, and colposcopies...educators for OB patients"

MENTAL HEALTH CENTER "collaborative partners...refer patients with severe mental health conditions...part of whole person wellness"

PRIVATE PRACTICES "specialists provide pro bono patient care...referrals for hospice care..."

OTHER "close working relationships with substance abuse programs, Head Start, school districts, and other local service agencies"

USING GRANT FUNDS TO IMPROVE PATIENT CARE

"Continued state community-based primary care funding is critical to the continued success of SFHC in achieving all current and new activities. Funding supports key providers, administrative time, staff and supplies necessary to provide access to high-quality, cost-effective healthcare to all, regardless of their ability to pay."
